**Muni-Only Lanes and Boarding Islands**

Existing transit boarding islands on Market Street are narrow — some are only 5 feet wide. Only half are Americans with Disabilities Act (ADA) accessible. They also cannot load two 60' articulated buses simultaneously.

Proposed curbside stops would be similar in design to transit boarding islands on 7th Street, 8th Street, 11th Street and Bayshore Boulevard, with a continuous bike lane between the island and the sidewalk.

**Existing Boarding Islands**

Current stops are often crowded and many are not ADA accessible.

Transit boarding island on Bayshore Boulevard.

**Public Meetings, March 2018**
